

HEDGEHOG CLASS HOME LEARNING

Friday 15th May 2020

English:	
Phonic update:	I would be grateful if you could have a go at checking which digraphs and trigraphs your child knows. This will help to give an idea of which they may need to focus on and whether they need to look at the next phase. I will take a photo of the digraphs/trigraphs and put it on Tapestry on Friday. If you could take a photo showing which ones they know/are not sure of, that would be great.

Maths:	
Number	Big Numbers Song - Jack Hartman
Shape, Space & Measures	White Rose Maths - Summer Week 4 Day 5 The Very Busy Spider https://whiterosemaths.com/homelearning/early-years/ Focus is on positional language

Topic:	The World around us!
	<p><u>Materials</u></p> <p>If you are able to, please listen to the story of Wendell's Workshop by Chris Ridell read by Keeley Hawes on CBeebies.</p> <p>Wendell is an inventor and makes things from rubbish and junk he has around his home. Your Friday challenge is to make something using things you can recycle that you have at home. I wonder what it will be? Will it be a robot like Wendell made? If you listen to the 'I've got a cardboard box' song that might give you some ideas too. Will your box be a rocket that will take you somewhere?</p> <p>Song is found at Out of the Ark Music at Home - Week 1 Saturday (sheet below of ideas linked to it though)</p>
PE	Linked to The Very Busy Spider story and White Rose Maths - can you make an obstacle course where you move under, over, through, behind, between different objects?

I hope you have a fabulous and fantastic fun packed Friday!

I'VE GOT A CARDBOARD BOX

By Mark & Helen Johnson

CHALLENGE

Find as many empty cardboard boxes as you can in the house – the bigger the better. Can you make any of the following from what you've found?

- A cardboard guitar
- A car
- A castle
- A marble run
- An indoor dog house/pet home
- A rocket
- Large letters to spell your name

DID YOU KNOW?

Sir Malcolm Thornhill produced the first commercial cardboard box in England in 1817. Nowadays, **the UK produces five billion cardboard boxes every year**. This is equal to a stunning 83 boxes per individual – that is a lot of cardboard!

Living in cardboard boxes is generally associated with homelessness. But in 2004, the architect Peter Ryan, from Melbourne, designed and built a liveable house made mostly from cardboard boxes.

TALK ABOUT

Where you would like to go if you could make a car/rocket/boat out of a cardboard box. Describe what it's like in as much detail as you can...

**"YOU CAN'T USE
UP CREATIVITY.
THE MORE YOU
USE, THE MORE
YOU HAVE."
Maya Angelou**

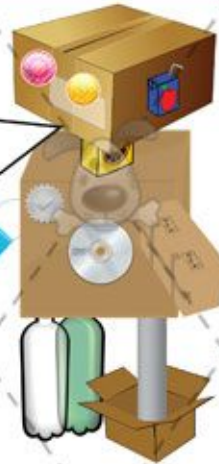

Song taken from
My World Toys & Games

Junk Modelling Challenge Cards

Junk Materials Challenge Cards

What could you create ?

Make a rocket that
can travel to the
moon and back.
